

EDENPURE Quartz Infrared HEATER SPECIFICATIONS

Provided by www.EdenPureSale.com

New Energy Tech Co. aka NETCO

EDENPURE GEN3 1000

- 60 Day NETCO Guarantee / 3 Year Manufacturer Warranty
- Front Panel Push Button Controls
- IR Remote Control
- Electronic Thermostat: range 50 to 90 degrees
- Heats up to 1000 square feet
- Caster Wheels
- Filter can be cleaned with warm water or a vacuum once removed from the back of the unit
- Modular design - galvanized steel inside / poly propylene shell
- ABS copolymer cabinet
- Weight: 26 lbs.
- Uses conventional 110v 3 prong outlet
- Height: 17" Width: 13" Depth: 18"
- Electric Cord 6.5' (78") long, 14 Gauge
- Rated at approximately 5000 BTU
- Amps: 12.5
- Watts: 1483
- Uses 6 commercial infrared quartz tubes
- Uses 3 Copper heat exchangers
- Made in factories throughout Asia
- Conserves energy compared to most other heaters
- Listed by Underwriters Laboratories (UL) No. E307136
- NETCO Free Shipping in the Continental USA - Alaska & Hawaii are \$50 extra.

SUNTWIN ELITE GEN3

- 60 Day NETCO Guarantee / 3 Year Manufacturer Warranty
- Front Panel Push Button Controls
- IR Remote Control
- Electronic Thermostat: range 50 to 90 degrees
- Heats up to 1000 square feet
- Caster Wheels
- Filter can be cleaned with warm water or a vacuum once removed from the back of the unit
- Modular design - galvanized steel inside / wood shell
- Oak Veneer wood cabinet
- Weight: 44 lbs.
- Uses conventional 110v 3 prong outlet
- Height: 17" Width: 13" Depth: 18"
- Electric Cord 6.5' (78") long, 14 Gauge
- Rated at approximately 5000 BTU
- Amps: 12.5
- Watts: 1483
- Uses 6 commercial infrared quartz tubes
- Uses 3 Copper heat exchangers
- Made in factories throughout Asia
- Conserves energy compared to most other heaters
- Listed by Underwriters Laboratories (UL) No. E307136
- NETCO Free Shipping in the Continental USA - Alaska & Hawaii are \$50 extra.

EDENPURE GEN3 500

- 60 Day NETCO Guarantee / 3 Year Manufacturer Warranty
- Rear Panel Push Button Controls
- No Remote Control
- Electronic Thermostat: range 50 to 90 degrees
- Heats up to 300 square feet
- Filter can be cleaned with warm water or a vacuum once removed from the back of the unit
- Modular design - galvanized steel inside / poly propylene shell
- ABS copolymer cabinet
- Weight: 21 lbs.
- Uses conventional 110v 3 prong outlet
- Height: 14" Width: 11" Depth: 14"
- Electric Cord 6.5' (78") long, 14 Gauge
- Rated at approximately 2300 BTU
- Amps: 7.5
- Watts: 900
- Uses 3 commercial infrared quartz tubes
- Uses 1 Copper heat exchanger
- Made in factories throughout Asia
- Conserves energy compared to most other heaters
- Listed by Underwriters Laboratories (UL) No. E307136
- NETCO Free Shipping in the Continental USA - Alaska & Hawaii are \$50 extra.

SUNTWIN FIREPLACE

- 60 Day NETCO Guarantee / 3 Year Manufacturer Warranty
- Front Panel Controls – High, Medium, and Low Heat
- Heats up to 1000 square feet
- Caster Wheels
- Wood Veneer Mantle Cabinet
- Uses conventional 110v 3 prong outlet
- Electric Cord 6.5' (78") long, 14 Gauge
- Rated at up to approximately 5000 BTU
- Watts: 1500
- PTC Ceramic Infrared Elements
- Mantle: Weight: 58.4 Lbs. Dimensions: 37" x 36" x 14"
- Insert: Weight: 52.4 Lbs. Size: 24 1/8" x 22 1/16" x 10 1/2"
- Ships in 2 boxes (Some Assembly is Required)
- Comes w Remote Control & Optional Wheels
- 6 Ember Settings – Low to High (Realist but Safe) Flames
- Made in factories throughout Asia
- All Components are UL or CSA Safety Certified
- Conserves energy compared to most other heaters
- NETCO Free Shipping in the Continental USA - Alaska & Hawaii are \$100 extra.

60 DAY NETCO SATISFACTION GUARANTEE & RETURN POLICY - Return Policy: You can return or exchange any purchase within 60 days for any reason but the CUSTOMER MUST PAY the Return Shipping and Handling fees. We must receive your return request by phone within 45 days after the date you received your items so that your purchase will reach us by the 60 day limit. NOTE: Items must be returned in the same box & packaging received by you with everything that was included in the original shipment. No returns will be accepted after 60 days. Please contact us by Phone FIRST for your Return Authorization and the "Return To" address. **Customer is responsible for Shipping & Tracking (and Costs) on Returned Goods. For Service Call: 303-225-8020.**

NOTE: If you Cancel an order "Before you have received it" ... There will be a 10% Cancellation Fee subtracted from your Refund.

NEW for the 2008 - 2009 Winter Season... The improved new advanced quartz infrared portable heater, the EdenPURE™ & SunTwin GEN3, has the real potential to reduce your heating bills. The EdenPURE™ GEN3 (Generation 3) may pay for itself in a matter of weeks and then start putting a great deal of extra money in your pocket after that. And that's just the start of the benefits for the new EdenPURE™ GEN3 Quartz Infrared Portable Heaters.

The GEN3 can be run on "Auto" mode; if the mode is set to "Auto" the unit will cycle on and off to maintain the desired temperature setting. It is also equipped with a "HIGH" mode; if the mode is set to "High" the unit will stay on Full power at the highest heat setting and keep heating. It will not cycle off on "High" mode.

When the GEN3 is set on the "Auto" mode and cycling off and on, it has been equipped with an Energy Savings feature. The unit will run on full power until it gets to within 2 degrees of the desired temperature. At this point it will automatically go into an energy savings mode which shuts down 2 of the heating elements and lowers the fan speed. Not only will this save energy, it also keeps the room temperature closer to the desired temperature. If the room temperature should fall below 2 degrees the unit will return to the full power mode until the desired temperature is reached again.

The EdenPURE™ GEN3 comes in the decorator color of black with burled wood accent and is now available from EdenPureSale.com in the GEN3 Models 1000 and 500. Don't let high energy costs get you down and order your EdenPURE™ GEN3 Quartz Infrared Portable Heater for your home or office today.

SunTwin GEN3 Quartz Infrared Heaters are "Big Brothers" to the EdenPURE Heaters (also sold by Biotech Research) as heard on PAUL HARVEY News! Same exact insides, just different cabinets, from the same company (Suarez Corporation Industries). Eden PURE & Sun Twin quartz infrared heaters give you healthy, comfortable, and economical heat.

Frequently Asked Questions

Q. What is ABS Plastic Cabinet? A. Acrylonitrile butadiene styrene (a heat resistant copolymer plastic)

Q. What is a SunTwin EdenPURE Quartz Infrared Heating System? A. Our Heating System is a revolutionary zone furnace that safely and efficiently heats entire areas that need additional heat.

Q. How does the initial cost and savings compare to other heaters?

A. The SunTwin & Eden PURE is a unique blend, built with yesterday's quality using tomorrow's technology, incorporating a beautiful cabinet, galvanized steel and micro-electronic genius. To invest in similar technology that would heat a comparable area could easily cost twice the initial investment without delivering the exclusive features and safe healthy benefits in this 3rd generation portable zone furnace.

Q. What's the difference between the SunTwin and EdenPURE heaters?

A. The SunTwin Heaters are "Big Brothers" to the Eden PURE Infrared Heaters (as heard on PAUL HARVEY News and sold nationwide by BioTech Research). Same insides, just different cabinets, from the same company - Suarez Corporation in North Canton, Ohio. The SunTwin has a wood cabinet and costs a few dollars more... The Eden PURE has a polypropylene cabinet.

Q. How much does it cost to run? A. Good question... because the cost to run the heater can vary quite a bit. The heater turns itself on and off with it's own thermostat so how much electricity it uses depends on many different factors... like how much insulation you have... how cold it is... if you have any drafts in the room... etc... but basically when the 1500 watt heater is on... it uses 1500 watts of electricity... about the same as a coffee maker or a hair dryer. The average cost to run one of these 1500 watt infrared heaters is about \$1 per day... when it's heating for about 8 hours... and the better your insulation... the lower the cost to run these heaters.
